

Ideation Phase

Define the Problem Statements

Date 31 January 2025

Team ID SWTID-2026-4968

Project Name Script - controlled ACL - Restrict Record Access Based On Field Value

Maximum Marks 2 Marks

Customer Problem Statement Template:

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love.

A well-articulated customer problem statement allows you and your team to find the ideal solution for the challenges your customers face. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

Example:

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	a user who needs access to records	access only the records I am authorized to view based on a field value	I may be able to see records that I should not have access to	record access is not restricted correctly according to the field value	concerned about unauthorized record access and data visibility
PS-2	an administrator responsible for record security	control record access dynamically using a scripted ACL	the ACL may not enforce the required field-based restriction consistently	the access rule needs to evaluate the relevant field value before allowing access	uncertain whether sensitive records are being protected as intended
